

Market Discipline: Disclosure on Risk Based Capital under Basel III as on 31 December 2024

Background

The purpose of Market Discipline in Basel III is to establish more transparent and more disciplined financial market so that stakeholders can assess the position of a Bank regarding holding of assets and to identify the risks relating to the assets and capital adequacy to meet probable loss of assets. For the said purpose, this Disclosures on Risk Based Capital (Basel III) is made as per Bangladesh Bank's Guideline.

A) Scope of Application	
Qualitative Disclosures	
a) The name of the top corporate entity in the group to which this guidelines apply:	<p>Islami Bank Bangladesh PLC.</p> <p>The Consolidated Financial Statements of the bank include the financial statements of (i) Islami Bank Bangladesh PLC (including Off-Shore Banking Units (OBUs). (ii) Islami Bank Securities Limited (iii) Islami Bank Capital Management Limited</p>
b) An outline of differences on the basis of consolidation for accounting and regulatory purposes, with a brief description of the entities within the group	<p>A brief description of the Bank (Main Operation) and its subsidiaries are given below:</p> <p>Islami Bank Bangladesh PLC.</p> <p>Islami Bank Bangladesh PLC was incorporated on March 13, 1983 as a Public Limited Company (Banking Company) with limited liability under the Companies Act 1994 as interest free Islamic Shari'ah based commercial bank and commenced its operation on March 30, 1983 with the permission of Bangladesh Bank. The authorized and paid up capital of the bank respectively stood at Tk.20,000 million and Tk.16,099.91 million as on December 31, 2024. Presently the Bank is operating its business through Head Office having 400 Branches (including 30 SME/ Agriculture Branches and 265 Sub-branches), 3027 own ATM booths and Cash Recycling ATM all over Bangladesh. The shares of the Bank are listed with both the Stock Exchanges of the country, i.e. Dhaka Stock Exchange Limited and Chittagong Stock Exchange Limited.</p>
c) Any restrictions, or other major impediments, on transfer of funds or regulatory capital within the group.	<p>Subsidiary Companies</p> <p>Islami Bank Capital Management Limited (IBCML)</p> <p>IBCML is a fully owned subsidiary of IBBL. IBCML was established in April 01' 2010 under the Companies Act 1994 as a Public Limited Company with Authorized Capital of Tk.1,000.00 million & Paid-Up Capital of Tk.300.00 million. The Company was established as per Bangladesh Bank Letter No. BRPD(R-1)717/2010-47 dated 07 February 2010. The registered Office of IBCML is located at 65, Dilkusha C/A in Dhaka, Bangladesh. The Company has obtained Merchant Banker Registration Certificate No. MB-95/2019 date: March 31' 2019 from Bangladesh Securities & Exchange Commission to operate the activities of Issue Manager/Underwriting/ Portfolio Manager.</p>

MOU Signing Ceremony

	<p>Islami Bank Securities Limited (IBSL)</p> <p>IBSL is also a fully owned subsidiary of IBBL. IBSL was incorporated in March 22' 2010 as a Public Limited Company under Companies Act, 1994 with the objectives to carry out business of Stock Broker & Dealer in the capital market. The authorized and paid up capital of the company stood at Tk.5,000 million and Tk.2,700 million respectively as on December 31, 2023. The overall increase of activities in Brokerage operation plays an important role in the improvement of capital market of the country and enhances earning capability of IBBL through corporate declaration.</p> <p>Not Applicable.</p>
d) The aggregate amount of capital surplus capital of insurance subsidiaries included in the capital of the consolidated group.	- Not Applicable.

B) Capital Structure

Qualitative Disclosures	
Summary information on the terms and conditions of the main features of all capital instruments, especially in the case of capital instruments eligible for inclusion in CET1, Additional Tier-1 or Tier-2	<p>As per the guidelines of Bangladesh Bank, CET-1 Capital of IBBL consists of (i) Fully Paid-up Capital, (ii) Statutory Reserve, (iii) General Reserve (iv) Non-Repayable Share Premium Account (v) Retained earnings (vi) Dividend equalization reserve and (vii) Minority interest in subsidiaries.</p> <p>Additional Tier-1 consists of Subordinated Debt (Mudaraba Perpetual Bond) (up to max. 1.5% of the Total RWA or 33.33% of CET1, whichever is higher).</p> <p>Tier-2 Capital consists of applicable amount of (i) General Provision (against Unclassified Investments, Off-Balance Sheet exposure & Off-Shore Banking Units) (ii) Assets Revaluation Reserves 50% of outstanding position as on 31 December' 2014, (iii) Revaluation Reserve for Securities 50% of outstanding position as on 31 December' 2014 (iv) Revaluation Reserve for equity instruments 10% of outstanding position as on 31 December' 2014 and (v) Subordinated Debt (Mudaraba Redeemable Bond) (Tier-2 Capital up to max. 4.0% of the total RWA or 88.89% of CET-1, whichever is higher).</p>

viii	Less: Total Regulatory Adjustment (vi + vii)	5,790.24	5,790.24
B	Total eligible Tier-2 Capital (v – viii)	27,208.40	27,208.40
C	Total eligible capital (Regulatory Capital) (A+B)	100,672.15	102,436.65

Note: Capital has been calculated considering the Regulatory forbearance. The aggregated required provision for investment, loans & advances and off-balance sheet exposures of Islami Bank Bangladesh PLC is Taka 77,422.25 crore and the maintained provision in the Financial Statements for the year ended 31 December 2024 is Taka 7,651.39 crore resulting actual shortfall in maintaining provision is Taka 69,770.86 crore. Islami Bank Bangladesh PLC has calculated the required provision against investment, loans & advances and off-balance sheet exposures as per forbearance letter vide: DOS(CAMS)1157/41(Dividend)/2025-3101, dated-21 May 2025 issued by Bangladesh Bank and kept the required provision accordingly adjusting the given forbearance. The forbearance facility for Taka 69,770.86 crore and CRAR would be (44.92%).

C) Capital Adequacy

Qualitative Disclosures	
a) A summary discussion of the Bank's approach to assess the adequacy of its capital to support current and future activities.	The Bank has adopted Standardized Approach (SA) to compute capital charge for investment risk and market risk, and Basic Indicator Approach (BIA) for operational risk. Assessment of capital adequacy is carried out in conjunction with the capital adequacy reporting to Bangladesh Bank. The Bank has maintained Capital to Risk-weighted Asset Ratio (CRAR) at 7.57% & 7.70% based on "Solo" and "Consolidated" respectively as against the minimum regulatory requirement of 10% plus Capital Conservation Buffer of 2.50% totaling of 12.50%. Tier-1 Capital to Risk Weighted Asset Ratio under "Solo" basis is 5.52% and "Consolidated" basis is 5.66% as against Minimum Tier-1 requirement of 6.00%. The Bank's policy is to manage and maintain strong Capital Adequacy Ratio through investing high rating grade investment clients. The Bank maintains adequate capital that is sufficient to absorb all material risks associated with the Bank. The Bank also ensures that the levels of capital comply with regulatory requirements and satisfy the external rating agencies and all other stakeholders including depositors.

Provision made during the period includes provision made against subjective judgment.

E) Equities: Banking Book Positions

Qualitative disclosures	
The general qualitative disclosures requirement with respect to equity risk, including:	
<ul style="list-style-type: none"> Differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and 	<p>Investment in equity securities are broadly categorized into two parts:</p> <ol style="list-style-type: none"> Quoted Securities (common or preference share & mutual fund) that are traded in the secondary market (Trading Book Assets). Unquoted Securities are categorized as banking book equity exposures which are further sub-divided into two groups: unquoted securities which are invested without any expectation that these will be quoted in near future i.e. held to maturity (HTM). Securities those are acquired under private placement or IPO and are going to be traded in the secondary market after completing required formalities. Unquoted securities are valued at cost.
<ul style="list-style-type: none"> Discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices. 	<p>The primary objective is to invest in equity securities for the purpose of capital gain by selling them in future or held for dividend income. Dividends received from these equity securities are accounted for as and when received and when right to receive is established. Both Quoted and Un-Quoted equity securities are valued at cost and necessary provisions are maintained if the prices fall below the cost price.</p> <p>As per Bangladesh Bank guidelines, the HFT equity securities are revaluated once in each week using mark to market concept and HTM equity securities are amortized once a year according to Bangladesh bank guideline.</p> <p>The HTM equity securities are also revalued if any, are reclassified to HFT category with the approval of Board of Directors.</p>

F) Profit Rate Risk in the Banking Book

Qualitative Disclosures	
a) The general qualitative disclosure requirement including the nature of Profit Rate Risk in the Banking Book (PRRBB) and key assumptions, including assumptions regarding investment prepayments and behavior of non-maturity deposits, and frequency of PRRBB measurement.	Profit rate risk is the risk where changes in market profit rates might adversely affect bank's financial condition. Changes in profit rates affect both the current earnings (earnings perspective) as well as the net worth of the bank (economic value perspective). Re-pricing risk is often the most apparent source of profit rate risk for a bank and is often gauged by comparing the volume of a bank's assets that mature or re-price within a given time period with the volume of liabilities that do so.

Market Risk

Qualitative Disclosure

i) Views of BOD on trading / investment activities	The Board approves all necessary policies related to market risk, sets various internal limits to monitor and review compliance on a regular basis. The objective of market risk management is to minimize the impact of losses on bank's earnings and shareholders' equity.
ii) Methods used to measure Market risk	The Bank measures impact on profitability and impact on asset prices under market risk through Maturity GAP Analysis, Sensitivity Analysis, VaR, and Mark to Market. Capital requirement under market risk as per Standardized rule based approach of Basel-III, is the aggregate capital requirement calculated for each of the risk sub-categories. For each risk category, minimum capital requirement is measured in terms of two separately calculated capital charges for "specific risk" and "general market risk".
iii) Market Risk Management system	The Bank has its own Market Risk Management System, which includes Asset Liability Risk Management (ALM) and Foreign Exchange Risk Management under core risk management guidelines. The Treasury Division manages market risk covering liquidity, profit rate, foreign exchange and equity price risks with oversight from Asset-Liability Management Committee (ALCO) comprising senior executives of the Bank. ALCO is chaired by the Managing Director & CEO. ALCO meets at least once in a month to monitor and oversee among others the overall market risks.

iv) Policies and processes for mitigating market risk	The bank has put its Asset Liability Management policy by setting various risk limits for effective management of market risk and ensuring that the operations are in line with bank's expectation of return to market risk through proper Asset Liability Management. The effectiveness of approved policies is monitored on an on-going basis. Foreign Exchange Open Position limits (Day limit / Overnight limit), Deal-wise cut-loss limits, Stop-loss limit, Profit / Loss in respect of cross currency trading are properly monitored and exception reporting is regularly carried out. Holding of equities is monitored regularly so that the investment remains within the limit as set by Bangladesh Bank. Asset Liability Management Committee (ALCO) analyzes market and determines strategies for mitigating market risks. Reconciliation of foreign transactions is also carried out regularly.

H) Operational Risk

Qualitative Disclosures

i) Views of BOD on system to reduce Operational Risk	<p>Operational risk is the risk of loss or harm resulting from inadequate or failure of internal processes, people and systems or from external events.</p> <p>The policy for measuring and managing operational risks including internal control & compliance risk is approved by the Board taking into account relevant guidelines of Bangladesh Bank. Audit Committee of the Board directly oversees the activities of Internal Control & Compliance to protect all operational risks. As a part of continued surveillance, the Management Committee (MANCOM), Risk Management Coordination Committee (RMCC), Risk Management Committee (RMC) of Board and Risk Management Wing (RMW) regularly review different aspects of operational risks and suggest to formulate appropriate policies, tools & techniques for mitigation of operational risk.</p>
ii) Performance gap of executives and staff	IBBL has a policy to provide competitive package and best working environment to attract and retain the most talented people available in the industry. It recognizes the importance of having the right people at right positions to achieve organizational goals. The learning and development strategy puts special focus on continuous professional development to strengthen individual's skill set by removing weaknesses to perform the assigned job with perfection. The strong brand image of IBBL plays an important role in employee motivation. As a result, there is no significant performance gap.
iii) Potential external events	No potential external events are expected to expose the Bank to significant operational risk.

iv) Policies and processes for mitigating operational risk	The policies for operational risks including internal control & compliance risk are approved by the Board taking into account relevant guidelines of Bangladesh Bank. The bank has put its policy guidelines on Risk Based Internal Audit (RBIA) system with a view to rating the branches. As per provision of RBIA, branches are rated according to their risk grading/scoring. Subsequently, Audit Division prepares their audit plan, procedure and frequency of audit to be conducted on Branches. All the business units and supporting units of Head Office primarily identifies operational risk issues through Departmental Control Function Check List (DCFCL) and Audit Division regularly reviews the reports and ensure implementation of the same. Bank's anti money laundering activities are continuously monitored by Chief Anti Money Laundering Compliance Officer (CAMLCO). The activities of Money Laundering and Terrorist Financing Division (MLTFPD) are devoted to protect all money laundering and terrorist finance related activities. Apart from that, there is adequate check & balance at every stage of operation, authorities are properly segregated and there is at least dual control on every transaction to protect against operational risk.
v) Approach to calculating capital charge for operational risk	Basic Indicator Approach is being used for calculating capital charge for operational risk as of the reporting date.

Quantitative Disclosures

As per the Risk Based Capital Adequacy Framework, the capital charge for operational risk is equal to 15% of average positive annual Gross Income of the previous three years:

In line with the above, the Bank has adopted the Basic Indicator Approach for computing capital to operational risk.
BDT in million

Capital Requirement	Solo	Consolidated
Operational Risk	7,966.27	8,058.08

I) Liquidity Risk

Qualitative Disclosure

i) Views of BOD on system to reduce liquidity risk	The Board approves the significant policies, sets tolerance limit for various liquidity risk indicators and risk appetites for liquidity risk management. The BOD also reviews the related policies and guidelines of liquidity risk and ensures necessary steps taken by management to identify, measure, monitor and control liquidity risk.
ii) Methods used to measure Liquidity Risk	<p>At a very basic level, liquidity measurement involves assessing of Bank's all cash inflows and its all cash outflows to identify the potential net surplus/(shortfall). Cash outflows also include funding requirements for off balance sheet commitments.</p> <p>IBBL uses two approaches/methods to measure Liquidity risk.</p> <p>(a) Time bucket analysis: Time bucket analysis is an assessment of cash flow mismatches and is done through preparation of Structural Liquidity Profile of on balance sheet and off balance sheet exposure. Appropriate tolerance levels/prudential limits have been stipulated for mismatches in different time buckets.</p>

	<p>(b) Ratio analysis: Under ratio analysis, various ratios are prescribed with appropriate limits. Several key liquidity risk indicators are being used to identify, measure, monitor and control liquidity position on regular basis. The key liquidity risk indicators are: Statutory Liquidity Ratio (SLR), Cash Reserve Ratio (CRR), Investment to Deposit Ratio (IDR) Maximum Cumulative Outflow (MCO), Medium Term Funding Ratio (MTFR) , Liquid Asset to Total Deposit Ratio, Liquid Asset to Short Term Liabilities, Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio(NSFR).</p>
<p>iii) Liquidity Risk management system</p>	<p>Responsibility of managing liquidity lies with Asset Liability Committee (ALCO) of the Bank which meets at least once in every month. Asset and Liability Management (ALM) desk closely monitors and controls liquidity requirements on a daily basis by proper coordination of funding activities. A monthly projection of fund flows is reviewed in ALCO meeting regularly.</p> <p>In order to develop comprehensive liquidity risk management framework, Contingency Funding Plan (CFP) has been developed which is a set of policies and procedures that serves as a blueprint for the bank to meet its funding needs in a timely manner and at a reasonable cost.</p> <p>For day-to-day liquidity risk management, CFP ensures that the bank is well prepared to respond to an unexpected problem. In this sense, a CFP is an extension of ongoing liquidity management and formalizes the objectives of liquidity management by ensuring: (i) a reasonable amount of liquid assets are maintained; (ii) measurement and projection of funding requirements during various scenarios; and (iii) management of access to funding sources.</p> <p>CFP also provides directions for plausible actions in distress and emergency situations. In case of a sudden liquidity stress, it is important for the bank to handle the same in an efficient and organized way to meet its obligations to the stakeholders. Since, such a situation requires a spontaneous action, CFP will put the bank in better position by addressing the liquidity problem more efficiently and effectively. CFP ensures that bank management and key staff are ready to respond to any distress situation.</p>
<p>iv) Policies and processes for mitigating Liquidity Risk</p>	<p>A structural maturity ladder or profile is prepared periodically following the guidelines of the Bangladesh Bank DOS circular no. 02 dated 29 March 2011. Maturity ladder of cash inflows and outflows is an effective tool to determine bank's liquidity position. It estimates a bank's cash inflows and outflows and thus net deficit or surplus (GAP) both on a day-to-day basis and over a series of specified times can be estimated. A bucket wise (e.g. call, 2-7 days, 1 month, 1-3 months, 3-12 months, 1-5 years, over 5 years) maturity profile of assets and liabilities is prepared to understand mismatch in every bucket.</p>

Quantitative Disclosure

Particulars	As on 31 December 2024
(Amount in million Taka)	
Liquidity Coverage Ratio (LCR)	72.98%
Net Stable Funding Ratio (NSFR)	101.43%
Stock of High Quality Liquid Assets (HQLA)	163,895.24
Total net cash outflows over the next 30 calendar days	381,329.08
Available amount of Stable Funding	1,668,318.56
Required amount of Stable Funding	1,644,780.61

J) Leverage Risk

Qualitative Disclosure

i) Views of BOD on system to reduce excessive leverage	The Board approves all policies related to Leverage Ratio. In order to avoid building-up excessive on-balance sheet and off-balance sheet leverage in the banking system, a simple, transparent, non-risk based leverage ratio has been introduced to constrain leverage in the banking sector.
ii) Policies and processes for mitigating excessive on and off-balance sheet leverage	Guidelines on Risk Based Capital Adequacy (Revised Regulatory Capital Framework for banks in line with Basel III) as provided by BRPD of Bangladesh Bank is followed by IBBL while managing excessive on and off-balance sheet leverage of the bank. As per RBCA Guidelines, leverage ratio is being calculated as Tier I Capital divided by Total Exposure (on and off-balance exposures) after related deductions.
iii) Approach for calculating exposure	<p>IBBL calculates the regulatory leverage ratio as per the guideline of Basel III leverage ratio framework as adopted by Bangladesh Bank where a minimum Tier 1 leverage ratio of 3.25% has been prescribed both at solo and consolidated level. IBBL has been maintaining leverage ratio more than minimum requirement of 3% applicable from 01 January 2015. The regulatory leverage ratio has been calculated considering the following:</p> <ol style="list-style-type: none"> 1. Capital Measure: The amount of capital (the numerator) for the leverage ratio is being calculated as per definition of Tier 1 capital as specified in Chapter 3 of 'Guidelines on Risk Based Capital Adequacy (Revised Regulatory Capital Framework for banks in line with Basel III)' 2. Exposure Measure: General Measurement Principles: The amount of exposure (the denominator) for the leverage ratio is being calculated following the accounting measure of exposure. In order to measure the exposure consistently with financial accounts, the following are being applied by the bank: <ol style="list-style-type: none"> i. On balance sheet, non-derivative exposures are being calculated by netting-off of specific provisions and valuation adjustment. ii. Physical or financial collateral, guarantee or credit risk mitigation purchased are not used for reducing on-balance sheet exposure. iii. No Netting off loans and deposits is done. <p>On-Balance Sheet Items: Bank has included the accounting balance sheet item for the purposes of leverage ratio.</p> <p>Off-Balance Sheet Item: Bank has calculated the off-balance sheet (OBS) items by applying a uniform 100% Credit Conservation Factor (CCF). For unconditionally cancellable commitments without prior notice, a CCF of 10% is applied.</p>

Quantitative Disclosures

Particulars	BDT in million	
	Solo	Consolidated
Leverage Ratio	3.32%	3.40%
On balance sheet exposure	2,165,163.04	2,165,736.20
Off balance sheet exposure	45,293.57	45,293.57
Total exposure	2,210,456.61	2,211,029.77

K) Remuneration

Qualitative Disclosures

a) Name, composition and mandate of the main body overseeing remuneration.	Board of Directors of the Bank is the main body to oversee the remuneration. The Board, however, generally suggest the management to place proposal for revision of remuneration from time to time.
External consultants whose advice has been sought, the body by which they were commissioned, and in what areas of the remuneration process.	Generally, no advice from any external consultant with regard to the remuneration process of the bank is sought whatsoever and therefore no commission to this effect is paid to any agencies.
A description of the scope of the bank's remuneration policy (e.g. by regions, business lines), including the extent to which it is applicable to foreign subsidiaries and branches.	The bank does not have any foreign subsidiary; rather it has branches as well as zonal offices throughout the country. IBBL follows uniform remuneration policy which does not change due to the employees working at diversified geographical locations.
A description of the types of employees considered as material risk takers and as senior managers, including the number of employees in each group.	No group of employees has been categorized as material risk taker as well as senior managers; rather the risks in different areas of operations of the bank are taken by the employees concerned as a team.
b) An overview of the key features and objectives of remuneration policy.	<p>Remuneration policy is based on attracting, retaining and motivating the employees to ensure that they perform in the best interests of the bank and its shareholders by growing and developing the business.</p> <p>The remuneration system of the bank has been designed to ensure optimum level of fairness in reward to the service of the employees in such a way so that they can satisfactorily manage the basic expenses concerning their household as well as get sufficient future benefits on attaining the superannuation. The key features of the remuneration system are as under:</p> <p>In consideration of the nature of works/responsibilities fixed remuneration has been established for the employees of a particular grade. However, the fixed remuneration differs from grade to grade and generally changes with the promotion/demotion to the higher/lower grades. The components of the fixed remuneration are basic pay, house rent, medical as well</p>

<p>Whether the remuneration committee reviewed the firm's remuneration policy during the past year, and if so, an overview of any changes that was made.</p> <p>A discussion of how the bank ensures that risk and compliance employees are remunerated independently of the businesses they oversee.</p>	<p>as conveyance allowances etc. The basic pay is increased at a fixed rate every year towards adjustment of the inflation. Employees may have additional remuneration by means of getting special increment, promotion for their extraordinary performance.</p> <p>Remuneration concerning the future benefits of the employees is paid in the form of Gratuity, Provident Fund and Superannuation Fund. The amount of such remuneration varies in terms of grade, basic pay as well as service length.</p> <p>Variable remuneration is paid to the employees in the form of Incentive Bonus on the basis of the performance resulting satisfactory annual profit of the bank. The overall performance of the employees is considered as team performance without categorizing any 'Identified Staff as Risk Takers' and Incentive Bonus is allowed to them in proportion to their respective basic pay.</p> <p>The remuneration of the bank was not reviewed by the Board of Directors last year and consequently no change whatsoever has taken place in the remuneration process</p>
<p>c) An overview of the key risks that the bank takes into account when implementing remuneration measures.</p> <p>An overview of the nature and type of the key measures used to take account of these risks, including risks difficult to measure (valued need not be disclosed).</p> <p>A discussion of the ways in which these measures affect remuneration.</p> <p>A discussion of how the nature and type of these measures has changed over the past year and reasons for the change, as well as the impact of changes on remuneration.</p>	<p>No segment of the employees has been categorized as the 'risk and compliance employees' and therefore no scope is there to separately remunerate such type of employees for their overseeing the business</p> <p>Basically, the 'fixed remuneration' process is being practiced and in some cases the adjustment of the losses, so incurred by the bank due to the employees' non-compliance of different rules & regulations is compensated from the fixed remuneration as well as deferred future benefits of the employees concerned through claw back process as a means of adjustment of the current and future risk.</p> <p>The risk of non-adherence to regulatory compliances as well as violations of different rules and procedures causing significant losses from the side of the employees is taken into consideration while implementing the remuneration measures.</p> <p>To avert the risks, the provisions with regard to partial payment of basic pay as well as non-disbursement of incentive bonuses and future benefits, claw back process from the monthly remunerations etc. are there.</p> <p>Various disciplinary measures ranging from the issuance of censure to dismissal from the service for committing the irregularities is there and such measures significantly affect the remuneration process.</p> <p>Over the past years, due to committing various types of violations, remuneration of the individual employees has been changed but no change affecting the remuneration system has taken place.</p>
<p>d) An overview of main performance matrix for the bank, top-level business lines and individuals.</p>	<p>The individual performance measurement metrics affecting the remuneration is strictly followed. Overall performance of the employee is considered as the team result.</p> <p>Variable remuneration in the form of Incentive Bonus is allowed to them in proportion to their respective basic pay, which generally varies in relation with the operating profit. However, employees may get accelerated promotion for extraordinary performance as well as may be awarded demotion for committing violations that has a link with the remuneration process.</p>

	In some cases, due to non-fulfillment of desired criteria as set by the Board, a portion of incentive bonus to some employees was not allowed. In some cases the employee's committing lapses and incurring financial losses, are not allowed the incentive bonus.
e) A discussion of bank's policy on deferral and vesting of variable remuneration and if, the fraction of variable remuneration that is deferred differs across employees or groups of employees, a description of the factors that determine the fraction and their relative importance.	To ensure long-term retention of the employee's remuneration concerning future benefits has been designed which includes Gratuity, Provident Fund, and Superannuation Fund etc.
f) A discussion of the bank's policy and criteria for adjusting deferred remuneration before vesting and (if permitted by national law) after vesting through claw back arrangements.	As per the prevailing practice, the incentive bonus, as variable remuneration, is to be completely paid to the eligible employees and any fraction thereof is not deferred with regard to the determination of their relative performance. Once the incentive bonus, as variable remuneration, is paid it cannot have refunded through claw back arrangement.
g) An overview of the forms of variable remuneration offered (i.e. cash, shares and share-linked instruments and other forms).	No different form with regard to payment of variable remuneration is there. The remuneration of the employees is paid in the form of cash.
h) A discussion of the use of the different forms of variable remuneration and, if the mix of different forms of variable remuneration differs across employees or groups of employees) a description the factors that determine the mix and their relative importance.	Not Applicable
i) Number of meetings held by the main body overseeing remuneration during the financial year and the remuneration paid to its members.	Not Applicable
j) Number of employees received a variable remuneration award during the financial year.	Not Applicable
k) Number and total amount of guaranteed bonuses awarded during the financial year.	02 (Two) incentive Bonus have been declared.
l) Number and total amount of sign-on awards made during the financial year.	Not Applicable
m) Number and total amount of termination payments made during the year.	Not Applicable
n) Total amount of outstanding deferred remuneration, split into cash, shares and share-linked instruments and other forms.	Not Applicable
o) Total amount of deferred remuneration paid out in the financial year.	Not Applicable
p) Breakdown of the amount of remuneration awards for the financial year to show - Fixed and variable - deferred and non- deferred - different forms used (Cash, Shares and share-linked instruments and other forms).	Not Applicable
q) Total amount of outstanding deferred remuneration and retained remuneration exposed to ex-post explicit and/or implicit adjustments.	Not Applicable
r) Total amount of reductions during the financial year due to ex post explicit adjustments.	Not Applicable
s) Total amount of reductions during the financial year due to ex-post implicit adjustments.	Not Applicable
