**Date: 12.04.2021**

Based on recommendation of Pre bid meeting held on 01.04.2021, ABW forwarded their views against the queries of the concerned bidders are as follows:

Bidder's Name	Query of the Bidder	Answer from IBBL
Optimal technologies Ltd.	For IP phone licensing issue with CUCM, we are requesting you to provide those third party phone connector licenses which would require from Cisco CUCM end. Hence, we are proposing Fanvil phones here. Therefore, Cisco will not release those licenses to us	We will not provide third party license to integrate with CUCM
	As we may not able to provide those licenses from Cisco, we are considering making a trunk in between CUCM+ SIP server. In this regard, Should we quote a different SIP server? If yes, then please share the number of terminated concurrent calls in between the CUCM+ our proposed SIP server.  If we provide different OEM IP phones does it require to provide your requested adapters of your existing Cisco phones? If yes, can we source it from international market?	We already have a SIP server which is trunked with CUCM. 100 concurrent call  Not required.
Excel Technologies Ltd	Your existing PABX system Brand & Model with software version.	Existing IPT System is CUCM (Cisco) Version: 11.0.1.20000-2
	Can you allow open SIP platform product?	Open SIP platform products are trunked with CUCM
	If you are using Cisco IP PABX, did you provide the Cisco open SIP license to integrate our phone set with your system?	No
	How many concurrent call you need?	100 concurrent call
