Customer support portal for raising case/ problem ticket/ trouble ticket/ issue ticket will carry 05 marks.

Additional Information to design a robust system for IBBL

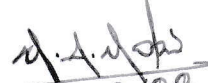

S/L	Feature	Additional Information
1	To design a robust system for IBBL	<ul style="list-style-type: none"> There should be HA architecture. HA will be Active-Standby model. The architectural design and implementation should be done by bidder. All required OS/Software license should be provided by Bidder which may be declared as additional price in financial offer. New licenses will be deployed in new server which will be provided by IBBL. This server may be scalable up to connect 10000 endpoint devices. The requirement for this server will be provided in written document by

		<p>bidder. IBBL will arrange this server by own.</p> <ul style="list-style-type: none">• The Bidder will provide all required license (e.g. OS, Database, Software, HA etc) and this cost will declare as additional price in financial offer.• The bidder will propose a process to migrate all expired endpoint devices to new license (in new server) after expiration.
